

At Nordson ASYMTEK, we understand the needs of those in electronics packaging and assembly. As the original jet dispensing innovator, we offer high-quality dispensing systems, exceptional jetting technologies, and the most advanced closed-loop process controls in the industry. With more than three decades of experience delivering value and outstanding applications expertise, we are uniquely positioned to empower your business.

Introducing Vantage™ Series

Advanced Dispensing for Precision Packaging and Assembly

FEATURES AND BENEFITS

- **Remarkable Speed and Accuracy without Compromise** – The new Vantage™ Series increases productivity up to 2X when compared to current generation platforms.* The highly stable design makes it possible to dispense at significantly accelerated speeds without sacrificing dispense accuracy.
- **An Expanded Dispense Area** – accommodates dispense areas up to 470 x 500 mm while retaining a compact footprint to maximize space efficiency.

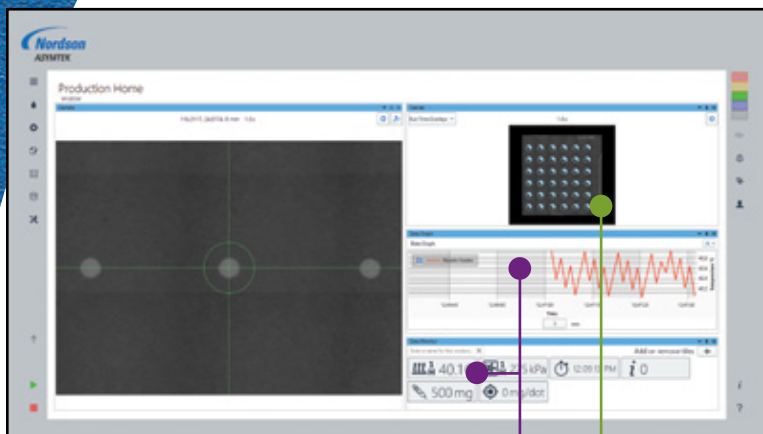

The Vantage™ Series is specifically designed for advanced semiconductor package, electromechanical, and printed circuit board assembly. This new, advanced platform is ideal for applications that involve high-speed or small-volume dispensing, tight keep out zones, or dispensing of thin and accurate lines.

Combined with the IntelliJet® Jetting System with RediSet® Jet Cartridge, the Vantage™ Series delivers cutting-edge reliability and micro-dot jetting up to 1,000 Hz frequency.

ASYMTEK

CANVAS™ DISPENSING SOFTWARE

Graphing and Data Tiles

Canvas Graphical Programming

A completely new software interface that simplifies your programming tasks and provides you with powerful insight and control over your process.

- **Graphical Programming** – lets you scan a workpiece, develop your program, and visualize the dispensing results on a virtual canvas prior to dispensing.
- **Guided Wizards** – provide easy step-by-step setup instructions.
- **Quick-Reference Graphing and Data Tiles** – allow you to control how system sensor and process data are displayed.

APPLICATION HIGHLIGHTS

Built on a new robust chassis designed to achieve high accuracy and speed, the Vantage™ Series delivers precise and reliable jetting up to 1,800,000 dots/hr.

Ultra-precise placement of <200 μ m fluid stream widths into narrow gaps

Accurate dispense line paths for volumes <1.5 nL as required for advanced wafer-level technology node scaling

High productivity dot jetting up to 2x faster than current platforms
